CONTROL ADDIN.

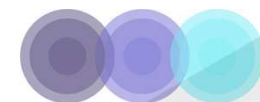

#bcoappendiscussion

The control add-in object allows you to add custom functionality to Dynamics 365 Business Central.

A control add-in is a custom control, or visual element, for displaying and modifying data within an iframe or a page.

Control add-ins can exchange data with the Dynamics 365 server on various data types and respond to user interaction to raise events that execute additional AL code.

#bcopendiscussion

Thank You!

See You Next Meeting.
