Isolated Events.

#bcopendiscussion

AL developers can raise an event that is guaranteed to invoke all event subscribers—even if some subscribers fail—and continue executing.

Isolated Events

- Defers errors until **after** the user has already logged in
- E.g. this event will never fail ***OnCompanyOpenCompleted***

Syntax:

```
[BusinessEvent(IncludeSender: Boolean [, Isolated: Boolean])]
```

Isolated Events

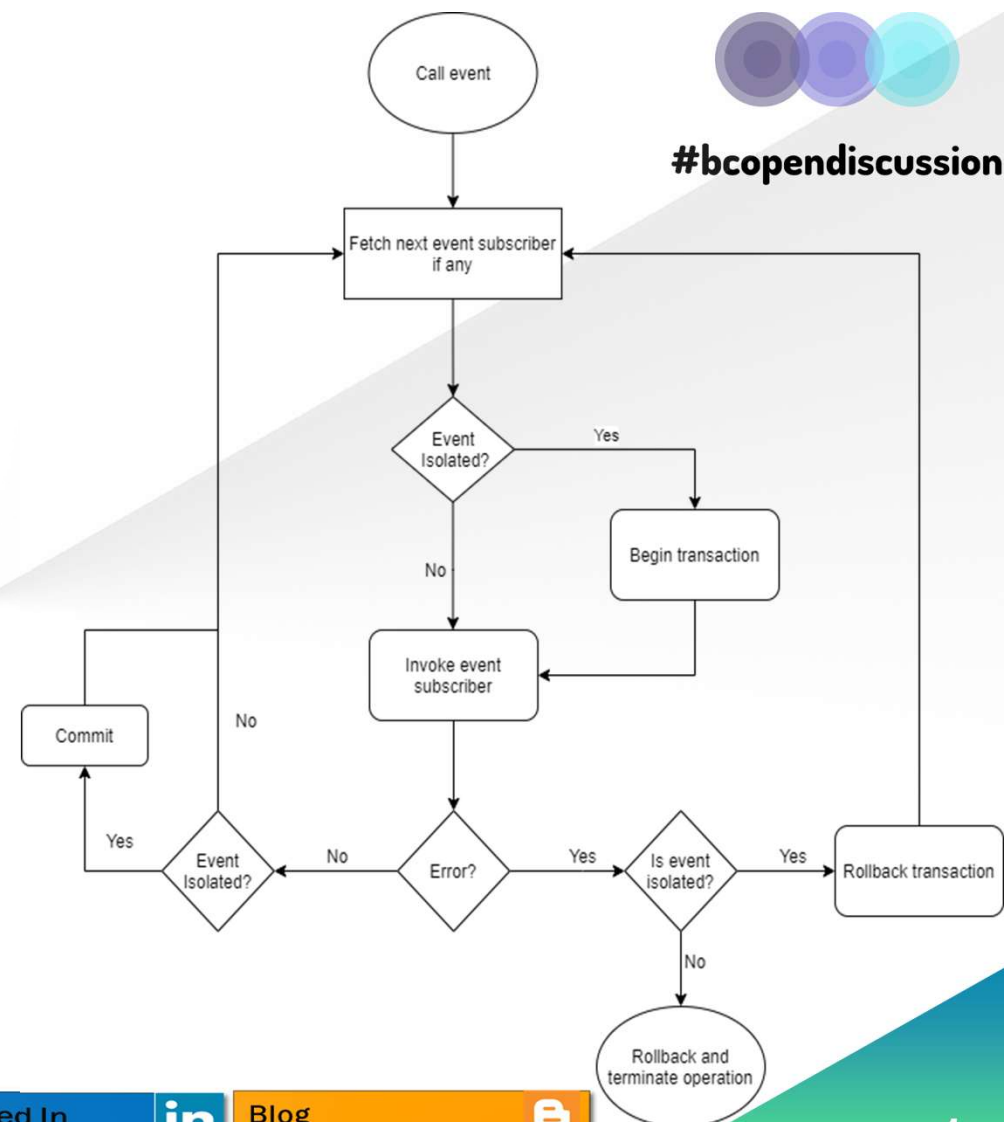

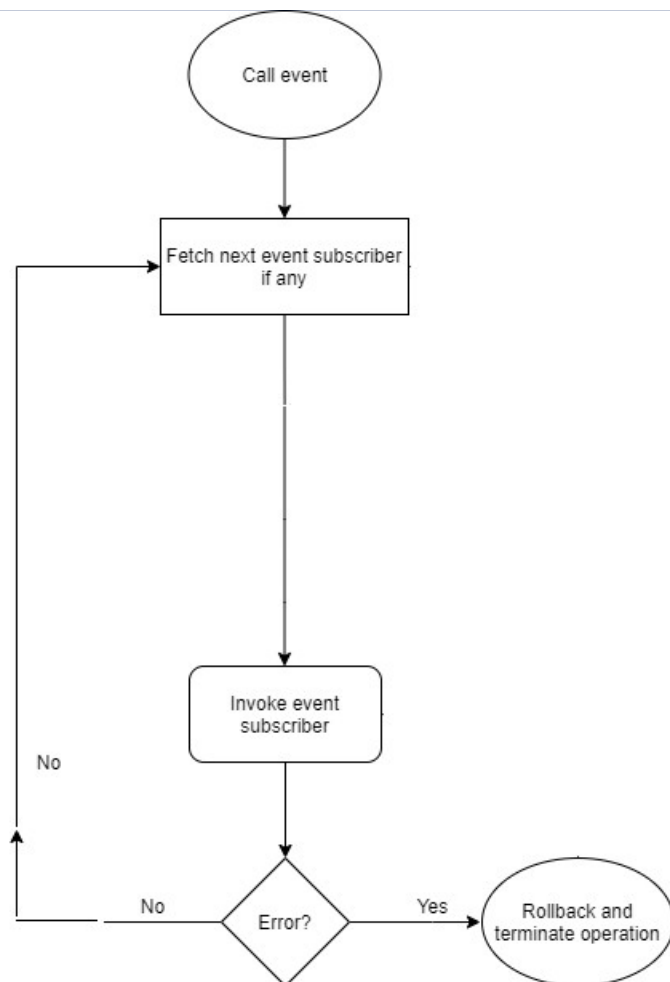

Raised event guaranteed to invoke all event subscribers – even if some subscribers fail – and continue executing

Works like Codeunit.Run:

- Each subscriber is executed in its own transaction
- Failures cause the transaction to be rolled back
- Errors are trapped and the execution continues

SECURITY ADMINISTRATORS CAN DEFINE DEFAULT PERMISSION SET ASSIGNMENTS WHEN USERS SIGN UP

The administrators can specify which permission sets or user groups are relevant for different product licenses and plans.

You can access new License Configuration from Administrator of Users, User Groups, and Permissions role center.

Set Default User Group and User Permission Set based on License attached to user.

License Configuration: All ▾		Search	+ New	Delete	Edit List	Configure
✕ One or more of the license configurations use implicit company permissions, which is not recommended. Learn more						
License						
Delegated Admin agent - Partner						
Delegated Helpdesk agent - Partner						
Internal Administrator						
<u>Dynamics 365 BC Premium Partner Sandbox</u>						
Dynamics 365 Business Central Essential - Embedded						
Dynamics 365 Business Central Team Member						
Dynamics 365 Business Central Premium						
D365 Business Central Basic Financials						
Dynamics 365 Business Central Essential						
D365 Business Central Infrastructure						
Microsoft Dynamics 365 - Accountant Hub						
Dynamics 365 Business Central Device - Embedded						
D365 Business Central Team Member - Embedded						
Dynamics 365 Business Central External Accountant						
Dynamics 365 Business Central Premium - Embedded						
Dynamics 365 Business Central Device - Embedded						
Dynamics 365 Business Central for IWS						

Deploy dependent projects in workspace

#bcopendiscussion

- ❑ To optimize the experience and remove unnecessary manual work, a new command will be available to traverse a project dependency graph in the workspace and install any required projects if these aren't already deployed to the NST server.
- ❑ AL: Publish full dependency tree for active project

NEW DESKTOP APP

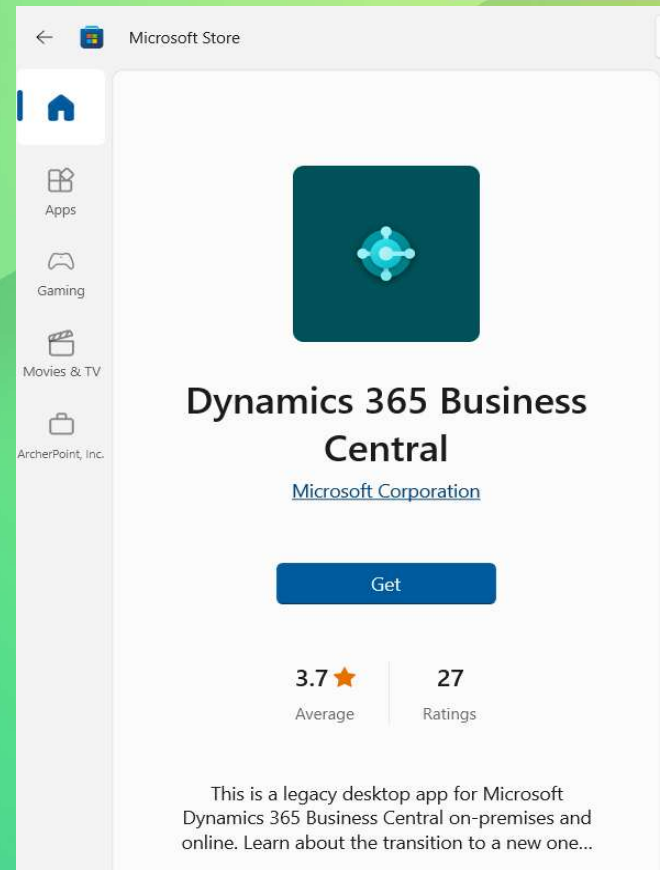

#bcopendiscussion

Having access to Business Central as an app installed on your device is preferred by many users.

The Progressive Web App-based desktop app is in the Microsoft Store and can be installed for both Business Central online and on-premises solutions.

It offers a full web client experience on the desktop (including features like multitasking, personalization, and cloud printing) while allowing customers to retain app-like behavior on their desktop (like pinning to the Start menu or taskbar).

#bcopendiscussion

Enhancements to Microsoft Teams integration

- ❖ When pasting a link to Business Central in the message compose area in Teams, a banner is now automatically displayed that suggests installing the Business Central app, so that a preview of the link can be shared as a compact and elegant card.
- ❖ This window now occupies more space on the screen, showing more fields and actions at once for greater efficiency.
- ❖ From the Details window, you can now open the full Business Central experience in the browser.
- ❖ To simplify the experience and allow a clear progression from card to details to separate window, the Popout button on cards has now been removed.
- ❖ *These enhancements are only available to Business Central online.*

OUTLOOK ADD-IN – ADD EMAIL ATTACHMENTS TO BUSINESS CENTRAL RECORDS

#bcopendiscussion

- ❑ The Outlook add-in now offers the option to copy email attachments to the record displayed in the add-in.
- ❑ Review and choose some or all the email attachments to add to the record.
- ❑ After attaching a file, coworkers can instantly download and view the file from the Attachments Factbox in any of their Business Central clients. or they can open the file in OneDrive to share and collaborate with their department.
- ❑ The feature is available for any records that use the Attachments Factbox, such as a vendor, customer, purchase invoice, or sales order.
- ❑ Alternatively, purchase invoices can be sent to the incoming documents feature for processing.

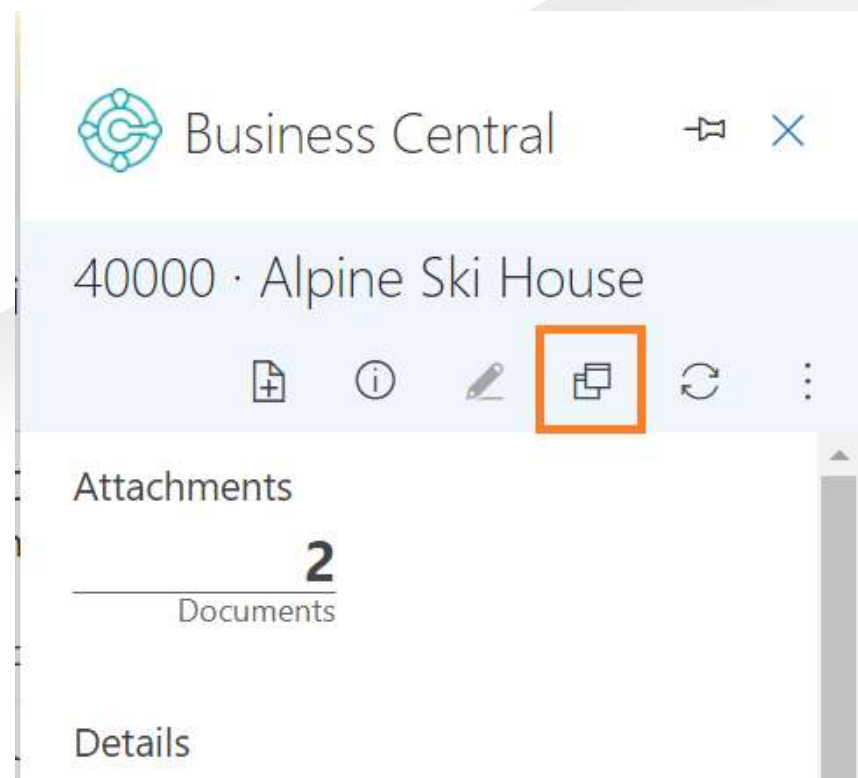

#bcopendiscussion

Outlook add-in pop out window enhancements

- ❖ Most pages displayed in the Outlook add-in include an action to open the page in a new window that can be resized or docked alongside Outlook.

#bcopendiscussion

Thank You!

See You Next Meeting.
