# QUESTION 156 -

#bcoappendiscussion

During Business central versioning, how build and revision are determined?  
<major>.<minor>.<build>.<revision>

According to the post below, a build number is 5 digits number, but how is it generated? If I want to follow the same versioning pattern for my extension, how can I accomplish that?

Reference:

<https://docs.microsoft.com/en-us/dynamics365/business-central/dev-itpro/administration/version-numbers>

## QUESTION 157 -

#bcoappendiscussion

Could you please discuss about OnLookup trigger with different scenario?

I found couple of in following two posts:

<https://yzhums.com/5985/>

<https://www.youtube.com/watch?v=sBkOiuEojcU>

But I want some more example and explanation from you. :)

# QUESTION 158

#bcoappendiscussion

Hi Saurav,

Hope you are doing great. I need a little help. I am trying to design the attached report from the Item table.

The requirement is to print 6 items per page. Any advice on this would be appreciated.

## QUESTION 159

#bcopendiscussion

Hi Saurav,

I have one query where I have the customized BC v14 DB(Fields & data in Base/Standard Table)

Now I want to upgrade this to BC On-Line version.

So when I convert all the table to AL Base application it will creates fields in base application.

Now BC SaaS version doesn't support modifying the Base Application so what to do in this case.

Looking forward.

#bcopendiscussion

# Thank You!

## See You Next Meeting.
